RESIDENT LEVELS OF CARE

DEPARTMENT of MEDICINE

NEPHROLOGY

Fellow Level: PGY 4

Core Competencies
1) Medical Knowledge
2) Patient Care Skills
3) Practice-based learning
4) Interpersonal and communication skills
5) Systems-based practice
6) Professionalism

Direct Supervision:
- The supervising physician is physically present with the resident and patient.

Indirect Supervision:
- With direct supervision immediately available—the supervising physician is physically within the hospital or other site of patient care, and is immediately available to provide Direct Supervision.
- With direct supervision available—the supervising physician is not physically present within the hospital or other site of patient care, but is immediately available by means of telephonic and/or electronic modalities, and is available to provide Direct Supervision.

Oversight:
- The supervision physician is available to provide review of procedures/encounters with feedback provided after care is delivered.

Consult Service:
The Fellow
- Reviews the history, physical examination, laboratory tests, differential diagnosis, assessment, recommendations (1,3,5)
- Elicits pertinent components of the history and physical examination and communicate the findings and recommendations to the patient or caregiver (1,2,3,4,5,6)
- Discusses the case with the referring physician or resident (1,2,3,4,5)

Consult Service:
The Fellow
- Discusses reasons for consultation with the referring physician (1,2,3,4,5)
- Introduces him/herself to the patient (2,4,6)
- Performs a history, physical examination, review the chart and laboratory tests, generate a differential diagnosis, make an assessment with recommendations (1,2,3,4,5,6)
- After discussions with the supervising physician the resident gives recommendations to the referring resident (1,3,4,5)
- Writes orders unique to the specialty of Nephrology such as HD orders (1,2,3,5)

Consult Service:
The Fellow
- Reviews and analyzes data collected from patient encounters (1,3,5)
- Communicates the results of the diagnostic tests and treatment to the patient and caregiver and arrange appropriate follow-up (1,2,3,4,5,6)
### Kidney Biopsy:

**The Fellow**

- Performs a percutaneous biopsy of the kidney using an automated biopsy needle with ultrasound guidance (1,2,3,4,5,6)
- Reviews the light, immunofluorescence, and electron microscopy of renal tissue with the Pathologist (1,3,4,5)

**Kidney Biopsy:**

**The Fellow**

- Performs and documents the history and physical examination (1,2,3,4,5,6)
- Develops and documents a differential diagnosis (1,3,5)
- Orders and interprets blood and urine tests (1,3,5)
- Orders pre-biopsy medications (1,2,3,4,5)
- Orders appropriate consults (1,3,4,5)
- Explains how the procedure is done to patient/caregiver (1,2,3,4,5,6)
- Discusses the potential complications of the biopsy and what is done to minimize these complications with patient/caregiver (1,2,3,4,5,6)
- Documents consent for the procedure on a consent form (1,2,3,4,5,6)
- Writes post-biopsy orders (1,2,3,5)
- Checks post-biopsy blood tests (1,2,3,5)

**Kidney Biopsy:**

**The Fellow**

- Reviews and analyzes data collected from patient encounters (1,3,4)
- Obtains and reviews renal biopsy results (1,3,4)
- Communicates biopsy results with the patient and/or caregiver (1,2,3,4,5,6)
- Formulates a treatment plan (1,2,3,4,5,6)

### Temporary Catheter for Hemodialysis:

**The Fellow**

- Places dual or triple lumen dialysis catheter in a central vein using ultrasound guidance (1,2,3,4,5,6)

**Temporary Catheter for Hemodialysis:**

**The Fellow**

- Obtains a focused history and physical examination as it pertains to central venous catheter placement (1,2,3,4,5,6)
- Orders and interprets blood tests before catheter placement (1,2,3,5)
- Informs the patient/caregiver the reasons for catheter placement (1,2,3,4,5,6)
- Explains how the procedure will be performed to patient/caregiver (1,2,3,4,5,6)
- Discusses the potential complications of central venous catheter placement and steps

**Temporary Catheter for Hemodialysis:**

**The Fellow**

- Informs the patient about need for dialysis, length of catheter use, and prognosis of renal failure (1,2,3,4,5,6)
Hemodialysis & Peritoneal Dialysis:

The Fellow

- Reviews the indication for dialysis therapy and writes appropriate orders (1,2,3,5)
- Takes care of post dialysis complications when they occur (1,2,3,4,5,6)

Nephrology Continuity Clinic:

The Fellow

- Reviews the history, physical examination, laboratory tests, differential diagnosis, assessment, recommendations from previous encounters (1,2,3,5)
- Elicits pertinent components of the history and physical examination and communicate the findings and recommendations to the patient or caregiver (1,2,3,4,5,6)
- Reviews and analyzes data collected from patient encounters (1,3,5)
- Communicates the results of the diagnostic tests and treatment to the patient and caregiver and arrange appropriate follow-up (1,2,3,4,5,6)

Nephrology Continuity Clinic:

The Fellow

- Takes care of complications that arise during the dialysis procedure (1,2,3,4,5,6)
- Expects to the patient/caregiver indications for dialysis, the dialysis procedure, and the duration of dialysis (temporary or permanent) (1,2,3,4,5,6)
- Obtains a consent for performing dialysis (1,2,3,4,5,6)
- Takes care of post dialysis complications when they occur (1,2,3,4,5,6)

Hemodialysis & Peritoneal Dialysis:

The Fellow

- Takes care of complications that arise during the dialysis procedure (1,2,3,4,5,6)
- Introduces him/herself to the patient (2,4,6)
- Performs a history, physical examination, review the chart and laboratory tests, generate a differential diagnosis, make an assessment with recommendations (1,2,3,4,5,6)
- After discussions with the supervising physician the resident gives recommendations to the referring resident (1,2,3,4,5)
- Writes appropriate drug prescriptions and explain them to the patient/caregiver (1,2,3,4,5,6)
- Explains to the patient/caregiver indications for dialysis, the dialysis procedure, and the duration of dialysis (temporary or permanent) (1,2,3,4,5,6)
- Obtains a consent for performing dialysis (1,2,3,4,5,6)
- Takes care of complications that arise during the dialysis procedure (1,2,3,4,5,6)
- Uses ultrasound guidance to locate the best possible site for central venous catheter placement (1,2,3,4,5,6)
- Writes orders for catheter use following placement (1,2,3,4)
- Obtains informed consent from the patient (1,2,3,4,5,6)

Nephrology Continuity Clinic:

The Fellow

- After discussions with the supervising physician the resident gives recommendations to the referring resident (1,2,3,4,5)
- Takes care of complications that arise during the dialysis procedure (1,2,3,4,5,6)
- Takes care of complications that arise during the dialysis procedure (1,2,3,4,5,6)
- Introduces him/herself to the patient (2,4,6)
### Conferences:

**The Fellow**
- Presents topics for Nephrology Grand Rounds, patient cases for Morbidity and Mortality Conference, patient cases at the Renal Pathology Conference, research at the Research Conference, Renal Book Chapter discussions at the Salt and Water Conference, Journal article discussion at the Journal Club Conference, and topic discussion at the NephSap Conference (1,4).

**The Fellow**
- Holds discussions with faculty mentors in preparation for a slide presentation, selecting a topic for research, guidance with the research protocol, obtaining approval from the IRB, guidance with preparation for any of the conferences mentioned in the first column (1,2,3)

**The Fellow**
- Holds discussions with faculty mentors in preparation for a slide presentation, selecting a topic for research, guidance with the research protocol, obtaining approval from the IRB, guidance with preparation for any of the conferences mentioned in the first column (1,2,3)

---

* A faculty physician, other than another resident, is physically present during the key portions of the procedure or is immediately available.
RESIDENT LEVELS OF CARE

| ▪ The supervising physician is physically present with the resident and patient. | ▪ With direct supervision immediately available—the supervision physician is physically within the hospital or other site of patient care, and is immediately available to provide Direct Supervision.  
▪ With direct supervision available—the supervision physician is not physically present within the hospital or other site of patient care, but is immediately available by means of telephonic and/or electronic modalities, and is available to provide Direct Supervision. | ▪ The supervision physician is available to provide review of procedures/encounters with feedback provided after care is delivered. |

The Resident

Peritoneal Dialysis Clinic:

- Review the history, physical examination, laboratory tests (1,3,5)  
- Elicit pertinent components of the history and physical examination and communicate the findings and recommendations to the patient or caregiver (1,2,3,4,5,6)  
- Discuss the case with the attending physician (1,2,3,4,5,6)  
- Make changes in treatment and peritoneal dialysis prescription when required (1,2,3,4,5,6)

The Resident

Peritoneal Dialysis Clinic:

- Review the history, physical examination, laboratory tests (1,3,5)  
- Elicit pertinent components of the history and physical examination and communicate the findings and recommendations to the patient or caregiver (1,2,3,4,5,6)  
- Discuss the case with the attending physician by telephone (1,3,4)

The Resident

Peritoneal Dialysis Clinic:

- Answer and treat peritoneal dialysis-related problems of patients with dialysis nurses over the telephone and discuss them with the attending when necessary (1,2,3,4,5,6)

* A faculty physician, other than another resident, is physically present during the key portions of the procedure or is immediately available.

6) Professionalism

Direct Supervision:

- The supervising physician is physically present with the resident and patient.

Transplant Service:

The Fellow

- Reviews the history, physical examination, laboratory tests, differential diagnosis, assessment, recommendations before and after the renal transplant (1,3,5)
- Elicits pertinent components of the history and physical examination and communicate the findings and recommendations to the patient or caregiver (1,2,3,4,5,6)
- Discusses the case with the transplant surgeon or surgery resident (1,2,3,4,5,6)

Transplant Kidney Biopsy:

The Fellow

- Performs a needle biopsy of the transplanted kidney using an automated biopsy needle with ultrasound guidance
Hemodialysis & Peritoneal Dialysis:

The Fellow

- Reviews the indication for dialysis therapy and writes appropriate orders (1,2,3,5)

Transplant Clinic:

The Fellow

- Reviews the history, physical examination, laboratory tests, differential diagnosis, assessment, recommendations in kidney transplant donors/recipients, and kidney transplant patients (1,3,5)
- Elicits pertinent components of the history and physical examination and communicate the findings and recommendations to the patient or caregiver (1,2,3,4,5,6)
- Discusses the case with the attending physician (1,2,3,4,5,6)
