Major Participating Institutions – LSU University Hospital (Parent Institution)

RESIDENT LEVELS OF CARE

DEPARTMENT OF OPHTHALMOLOGY
Resident Level: PGY-2
LEVEL 1

Core Competencies [Insert #’s of core competencies evaluated with each learning objective.]
1) Medical Knowledge
2) Patient Care Skills
3) Practice-based learning
4) Interpersonal and communication skills
5) Systems-based practice
6) Professionalism

Direct Supervision:
- The supervising physician is physically present with the resident and patient.
- (*) A faculty physician, other than another resident, is physically present during the key portions of the procedure or is immediately available.

Indirect Supervision:
- With direct supervision immediately available—the supervision physician is physically within the hospital or other site of patient care, and is immediately available to provide Direct Supervision.
- With indirect supervision available—the supervision physician is not physically present within the hospital or other site of patient care, but is immediately available by means of telephonic and/or electronic modalities, and is available to provide Direct Supervision.

Oversight:
- The supervising physician is available to provide review of procedures/encounters with feedback provided after care is delivered.

The Residents at this Level Should:
The following procedures may be performed under supervision during Surgical Subspecialty Rotations during the PGY-2 year:
- Performs electrocautery [1,2]
- Wound closure (suture) [1,2]
- Wound care [1,2]
- Wound irrigation and debridement [1,2]
- Treatment of extraocular/intraocular, orbital/lid infections [1,2]
- Performs retinal laser procedure (PRP) [1,2]
- Performs irid trabecular meshwork laser procedure (YAG laser)* ALT [1,2]
- Performs excision of lid/congenital lesions* [1,2]
- Excision of chalazia, performs tarsorrhaphy [1,2]
- Levator* [1,2]
- Resection [1,2]
- Frontalis-slings *[1,2]

The Residents at this Level Should:
- Perform and Document Histories and Physical Exams [1,2,3,4,6]
- Performs differential diagnosis [1,2,3,4,5]
- Develops and documents pre and post op care [1,2,3,4,5]
- Obtains and documents informed consent [1,2,3,4,5,]
- Request and review consultation [1,2,3,4,5,6]
- Orders diagnostic test/s [1,2,3,4,5]
- Orders medications [1,2,3,4,5,6]
- Orders work-ups for Uveitis Orbit disorders [1,2,3,6]

The Residents at this Level should:
- Document Patient Status by Clear and Legible Notes [1,2,3,4,5]
- Dictate Discharge Summaries [1,2,3,4,5,6]
- Dictate Operative Notes [1,2,3,4,5,6]
- Learn & Apply Appropriate ICD / CPT Codes & Understand Documentation Needed [1,2,3,4,5,6]
- Collect Specimens (Urine, Sputum, Drainage, etc.) for Submission to Laboratory or for Examination [1,2,5]
- Maintain Correct & Complete Medical Record [1,2,4,5,6]
- Use & Understand the Nursing Notes & Patient Data [1,2,4,5]
- Utilize the Institutional Resources & Case Management Services for Discharge Planning & Follow-Up [4,5,6]
- Understand the Methods of Outcomes Assessment [3]
- Be Aware of the Principles of Peer
- Performs enucleation/eviscerations [1,2]
- Performs pterygium excision with autograft* [1,2]
- Performs extracapsular cataract surgery* [1,2]
- Obtains and applies split thickness skin graft* [1,2]
- Performs canthotomy cantholysis* [1,2]
- Perform Strabismus surgery* [1,2]

Review & Cooperate with the GMEC & CQI Processes & Activities [3,5]
- Understand the Concept of Risk Management & the Needed Documentation in the Medical Record [3,5]
- Understand the Principles of Clinical Research & Clinical Trials, & be Able to Perform Basic Statistical Analysis of Data & Interpretation of Published Results [1,4,5]
- Develop Computer Skills & Use Available Resources [4,5]
- Obtain Basic & Advanced CPR (BCLS & ACLS / ATLS) Certification [1,2,5]

Additionally, Residents at this Level:

Should Begin to Acquire Knowledge of the Six Core Clinical Competencies and the Evaluation Process Used to Monitor Their Progress Toward Achieving Success in the Following Domains:

- **Patient Care** - Residents must be able to provide patient care that is compassionate, appropriate, and effective for the treatment of health problems and the promotion of health. [1]

- **Medical Knowledge** - Residents must demonstrate knowledge of established and evolving biomedical, clinical, epidemiological and social-behavioral sciences, as well as the application of this knowledge to patient care. Residents are expected to perform at, or above the National Average of Peers on the OKAP Examination. [2]

- **Practice-based Learning and Improvement** - residents must demonstrate the ability to investigate and evaluate their care of patients, to appraise and assimilate scientific evidence, and to continuously improve patient care based on constant self-
Residents are expected to develop skills and habits to be able to meet the following goals:

- identify strengths, deficiencies, and limits in one’s knowledge and expertise; [3]
- set learning and improvement goals; [3]
- identify and perform appropriate learning activities; [3]
- systematically analyze practice using quality improvement methods, and implement changes with the goal of practice improvement; [3]
- incorporate formative evaluation feedback into daily practice (including SECURE’s Observed Patient Encounters and Operative Performance Rating Forms); [3]
- locate, appraise, and assimilate evidence from scientific studies related to their patients’ health problems; [3,5]
- use information technology to optimize learning; and,[3,5]
- participate in the education of patients, families, students, residents and other health professionals. [3,4]

• **Interpersonal and Communication Skills** - Residents must demonstrate interpersonal and communication skills that result in the effective exchange of information and collaboration with patients, their families, & health professionals. [4]

Residents are expected to:

- communicate effectively with patients, families, and the public, as appropriate, across a broad range of socioeconomic and cultural backgrounds; [4]
- communicate effectively with physicians, other health professionals, and health related agencies; [4]
work effectively as a member or leader of a health care team or other professional group; [4]
act in a consultative role to other physicians and health professionals;[4] and,
maintain comprehensive, timely, and legible medical records, if applicable.[4]

• Systems-based Practice - Residents must demonstrate an awareness of and responsiveness to the larger context and system of health care, as well as the ability to call effectively on other resources in the system to provide optimal health care. Residents are expected to:
  work effectively in various health care delivery settings and systems relevant to their clinical specialty; [5]
  coordinate patient care within the health care system relevant to their clinical specialty; [5]
  incorporate considerations of cost awareness and risk-benefit analysis in patient and/or population-based care as appropriate; [5]
  advocate for quality patient care and optimal patient care systems; [5]
  work in inter-professional teams to enhance patient safety and improve patient care quality;[5] and
  participate in identifying system errors and implementing potential systems solutions. [5]

• Professionalism - Residents must demonstrate a commitment to carrying out professional responsibilities and an adherence to ethical principles. Residents are expected to demonstrate:
  compassion, integrity, and respect for others; [6]
  responsiveness to patient needs that supersede self-interest; [6]
- respect for patient privacy and autonomy; [6]
- accountability to patients, society and the profession;[6] and,
- sensitivity and responsiveness to a diverse patient population, including but not limited to diversity in gender, age, culture, race, religion, disabilities, and sexual orientation.[6]
