

LSUHSC-Shreveport

Department of Cellular Biology & Anatomy

2019 Spring Seminar Series

Seminars begin at **11:30 am** in Room 8-201 (Anatomy Conference Room)

February 7	Hemangini Dhaibar Graduate Student Cellular Biology & Anatomy LSUHSC-Shreveport	Cardiorespiratory profiling reveals primary breathing dysfunction as a candidate mechanism for sudden death in epilepsy
February 28	Bandana Shrestha, PhD Post-Doctoral Fellow Molecular & Cellular Physiology LSUHSC-Shreveport	Antioxidant glutathione regulation of pro-angiogenic factors during ischemia
March 7	Minsup Lee, PhD Post-Doctoral Fellow Molecular & Cellular Physiology LSUHSC-Shreveport	Development of experimental ocular diseases
April 4	Isabella M. Grumbach, MD, PhD, FAHA Professor of Medicine Professor of Radiation Oncology Vice-Chair for Research Division of Cardiovascular Medicine University of Iowa Health Care	Mitochondrial function in neointima formation
April 18	Yulong Li, MD, PhD Professor Department of Emergency University of Nebraska Medical Center	TBA
April 25	Harpreet Singh, PhD Associate Professor Department of Physiology and Cell Biology, The Ohio State University	TBA
May 2	Krystle Troclair Graduate Student Cellular Biology & Anatomy LSUHSC-Shreveport	Matter of the heart or head?: Tissue-specific origins of cardiac abnormalities associated with Kv1.1 deficiency
May 30	Traci Goodchild, PhD Associate Professor Department of Pharmacology Director, Cardiovascular Center Translational Core Laboratory LSUHSC - New Orleans	Treating the Failing Heart by Denervating the Kidney
